Regulatory Tracking Summary

15 July 2011

This report summarizes regulatory items reviewed by the NASA RRAC PC. Items that appeared to have limited interest to the NASA community, or are provided for information only, are shown in light gray text. Notes and comments by the RRAC PC are shown in bold, blue text under "Description." Related documents and citations, such as "76 FR 51967," are linked to the appropriate document for quick access. Suggested follow-up actions are noted with significant items; users are advised that other follow-up actions may be appropriate for their program or facility. Previous issues of this regulatory summary are archived on the RRAC PC website at <http://www.nasa.gov/offices/rrac/home/>. Comments, questions, suggestions, and requests for further information should be directed to the RRAC PC Manager, Sharon Scroggins at 256-544-7932 (sharon.scroggins@nasa.gov).

Only affects permittees in states where EPA has jurisdiction over the NPDES program.	

1.2 Other News and Developments

1.2.1 Proposed Rule Revises Definition of Solid Waste Under RCRA

On 30 June 2011, EPA posted a [pre-publication version](#) of a proposed rule that would revise and clarify the RCRA "definition of solid waste" (DSW). The proposed rule specifically would modify the DSW to include certain types of hazardous secondary materials that currently are conditionally excluded from the DSW. RCRA was modified in 2008 to exclude certain types of hazardous secondary materials from the DSW. The exemptions originally were intended to encourage the recovery, reuse, and recycling of valuable resources.

EPA is proposing the DSW revisions in response to stakeholder concerns that hazardous secondary materials can harm human health and the environment. EPA will accept comments

on the proposed rule for 60 days after publication in the Federal Register. More information about the proposed rule can be found on the EPA [website](#).

1.2.2 Changes Planned for IRIS

On 12 July 2011, EPA [announced](#) a plan to make changes to the IRIS program, which provides risk information regarding human health effects that could result from exposure to environmental contaminants. EPA plans to:

- Edit assessment documents to reduce the volume of text and address redundancies and inconsistencies.
- Enhance the clarity and transparency of data evaluation and the presentation of findings and conclusions.
- Increase the use of tables and figures to improve communication of information.
- Provide a fuller discussion about the methods used in the IRIS assessments.
- Provide a more detailed approach for assembling and evaluating scientific data.
- Implement a more uniform approach to evaluate critical studies.
- Increase the clarity of the rationale for selecting the studies used to calculate toxicity values.
- Set up a dedicated advisory committee that will focus exclusively on the quality, transparency, and scientific rigor of IRIS assessments.
- Create a peer consultation step early in the development of major IRIS assessments.

The IRIS improvement plans come in response to recommendations made by the National Academy of Sciences after reviewing an EPA IRIS Assessment in April 2011. More information regarding the IRIS program and the proposed changes to the program can be found on the EPA [website](#).

1.2.3 Water Efficiency Tools and Resources Available to Federal Employees

On 12 July 2011, FedCenter added "water efficiency" as a program topic and now provides links to online tools, techniques, and resources that federal environmental managers and facility managers can use for improving water use efficiency for both potable and non-potable water resources. More information about the new water efficiency program can be found on the FedCenter [website](#).

1.2.4 Proposed Secondary Standards for Nitrogen Dioxide and Sulfur Dioxide

On 12 July 2011, EPA released a [pre-publication version](#) of a proposed rule to add 1-hour secondary standards for NO₂ and SO₂ identical to the NO₂ and SO₂ primary 1-hour standards to reduce their deposition to sensitive aquatic and terrestrial ecosystems. The proposed 1-hour secondary NO₂ standard would be set at 100 ppb and the proposed 1-hour secondary SO₂ standard would be set at 75 ppb. EPA proposes to retain the current NO₂ and SO₂ secondary standards, which protect vegetation from exposure to gaseous oxides of nitrogen and sulfur in the ambient air.

EPA also plans to undertake a field pilot program to gather and analyze data to enhance the Agency's understanding of the degree of protectiveness of a new multi-pollutant approach. EPA will accept comments for 60 days after the proposed rule is published in the Federal Register and intends to issue a final rule by March 2012. More information about the proposed rule can be found on the EPA [website](#).

1.2.5 Western Climate Initiative

The WCI Offsets Committee has released a draft process for reviewing and recommending offset protocols. The draft process provides a step-by-step description of how WCI Partner jurisdictions will review existing offset protocols in regard to how they meet the WCI offset criteria. Comments regarding the draft process are due 19 August 2011.

1.3 NASA Regulatory Communication Working Group Updates

Regulatory Communication Working Group calls in 2011 will be held on the following Wednesdays at 12 p.m. CT:

- 17 August
- 21 September
- 19 October
- 16 November

2.0 State Regulatory Reviews

The following sections provide details about the regulatory actions reviewed for selected states in which NASA facilities and related operations are located.

UT071511-1	Air SIP-NSR	07/15/2011	76 FR 41712	Final Rule	<p>U.S. Environmental Protection Agency</p> <p>Approval, Disapproval, and Promulgation of Air Quality Implementation Plans; Utah; Revisions to New Source Review Rules [40 CFR Part 52]</p> <p>Partially approves and partially disapproves revisions to Utah's SIP. Utah has a federally approved PSD preconstruction permit program for new and modified sources that affect state attainment areas. Utah requested approval of its revised rules to implement the non-vacated provisions of EPA's NSR Reform regulations. EPA proposed approval of these rules on 01/07/2009 and received adverse comments. In this action, EPA responds to these comments and announces EPA's final rulemaking action. Effective 08/15/2011.</p> <p>This action affects major stationary sources in Utah that are subject to or potentially subject to the PSD preconstruction permit program.</p>
